To Whom It May Concern:

In reference to your request for a Material Safety Data Sheet (MSDS) for our products, it has been determined that our product is not required to have a MSDS. The product is exempt from the requirements of OSHA's Hazard Communication Standard since it is classified as an article.

The Hazard Communication Standard (29 CFR 1910.1200), paragraph (c), defines a product as an article if it is an item other than a fluid or particle that:

- 1- Is formed to a specific shape or design during manufacturing.
- 2- Has an end use function(s) dependent in whole or part upon its shape or design during end use.
- 3- Under normal conditions of use, does not release more than very small quantities, e.g. minute trace amounts of a hazardous chemical and does not pose a physical hazard or health risk to employees.

Our product meets this definition and is exempted under 29 CFR 1910.1200 (b)(6)(v) from having a MSDS.

If you have specific safety or occupational health concerns with our product, please contact our Corporate Safety Director so that she may help you with any problems you may have encountered.

Respectfully,

William C. Andrlick, V.P.
Vertex, Inc.

Kelly Sanchez
